

# Roadmap Proposal for Entrepreneur/Company Green Activities

This roadmap provide guidance to implement sustainable practices and make a positive environmental impact.

## 1. Day to Day Operations efficiency

- Start taking notes on your day to day activities from all Departments that has consumed your resources. We need to be **aware on the resources usage** to ensure starting from beginning, we have not selected a redundant resources.
- Afterwards we **breakdown the process** activities to **calculate the resource consumption** rate/hour or per unit product. This will help us to understand your energy consumption rate/hour or per unit. For services Company, we can check the laptop energy usages.
- After the product is finished, we shall **re-iterate the distribution process and marketing process**. We aim not to change the existing standard result; but we aim to change to increase the existing standard result.

## 2. Long term efficiency project budget calculator

- After reiterating all activities from input-process-output / resources-activities-result; we shall breakdown the activities to achieve significant target of savings within 3 - 10 years ahead.
- Grace Consult Group offers advisory services to help you calculate/determine your project efficiency budget.

## 3. Let Communities know your Contribution/Savings

We need to make sure our activities are approved by the Community and at the same time obtain their consent on other activities that the Company aim to address. We can post it on social media/newspaper to reach for more impact.

## 4. Gain access for green activities improvement towards new research/inventions

- After formulating long term green activities and communities approval; we seek to improve it by using the latest inventions to be implemented in the Company.
- This will then help to refine Step 2 again before long term implementation.

## 5. Implement continuous improvement in green activities

- Let's implement the green activities with long term outlook for clear savings and approval from communities. We believe this shall boost your product/services sales by making communities aware of your green initiatives.
- Grace Consult Project Management Office help your Company to have a dedicated team to validate the implementation success rate and achieve your savings and also connect you with relevant IPs or patents for your Company Development.
